Re: Tom F. Huth
KMYC(AM), Marysville, CA
Facility Identification Number: 40633
Special Temporary Authority (STA)
BESTA-20190102AIT

Dear Mr. Huth:

This is in reference to the request filed on January 2, 2019. You requested an extension of the STA granted on August 21, 2015, to continue ND operation pending the filing of the required FCC Form 302 application as requested in the Commission's letter dated April 28, 2015, dismissing BZ-20140828AEL.¹ In support of the request, we noted that additional time has been requested to file the application to update all operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and you may continue to operate ND with a maximum of 1.25 kW day and 0.25 kW night. You must reduce power or cease operations if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **July 5, 2019**.

¹ KMYC(AM) is licensed for DA operation on 1410 kHz with 5 kW day and 1 kW night.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop on the left and a series of smaller loops and strokes on the right.

Joseph Szczesny, Engineer
